LOCAL NEWS, SMARTLY DELIVERED

ZIP TALES

PRODUCT : ZIP Tales

TEAM : Code Breakers

PROBLEM STATEMENT

The proliferation of fake news and misinformation poses a significant threat to informed decision-making and community trust. Many individuals struggle to discern credible news sources from unreliable ones, leading to confusion and skepticism about the information they receive.

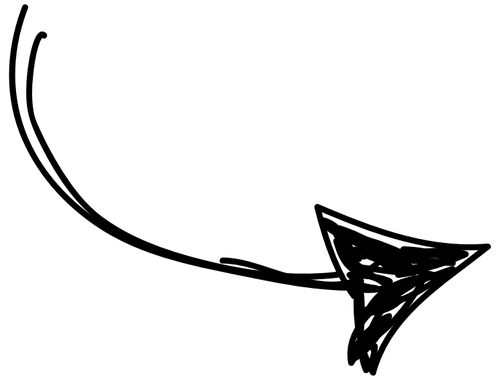

ISSUES ADDRESSED

- **Lack of Reliable Sources:** Difficulty in identifying trustworthy news outlets and content.
- **Misinformation Spread:** Rapid dissemination of false information across social media and online platforms.
- **Low Media Literacy:** Insufficient understanding of how to critically evaluate news and distinguish fact from fiction.
- **Community Disengagement:** A growing sense of disconnection and distrust among community members regarding news content.

PROPOSED SOLUTION

ZIP TALES: Local News, Smartly Delivered

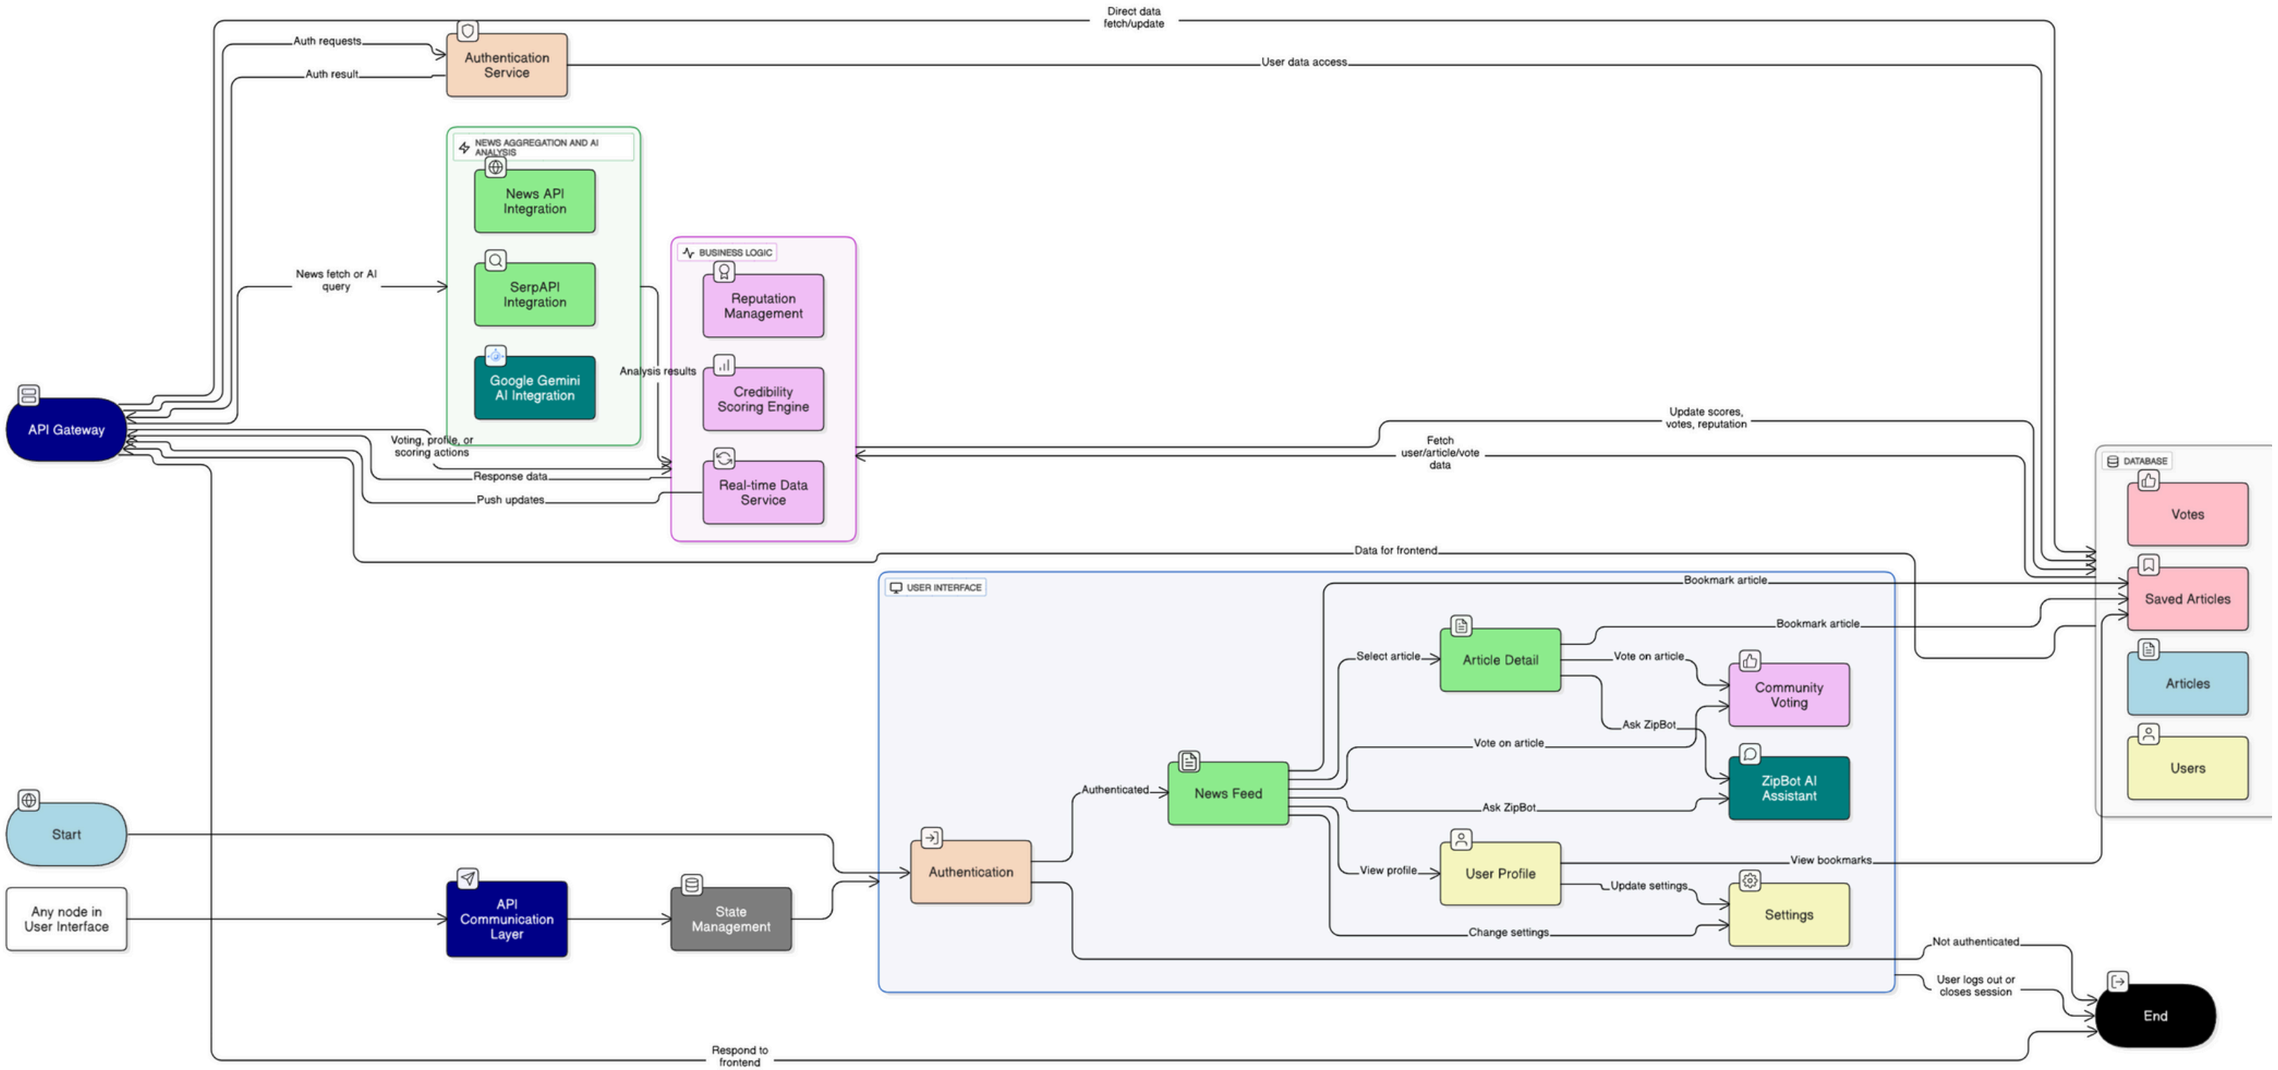

To combat the challenges of fake news and misinformation, ZIP TALES will launch an AI-powered news verification platform designed to enhance credibility assessment and engage the community effectively. By leveraging advanced technology and user participation, the platform aims to restore trust in local news and promote informed decision-making.

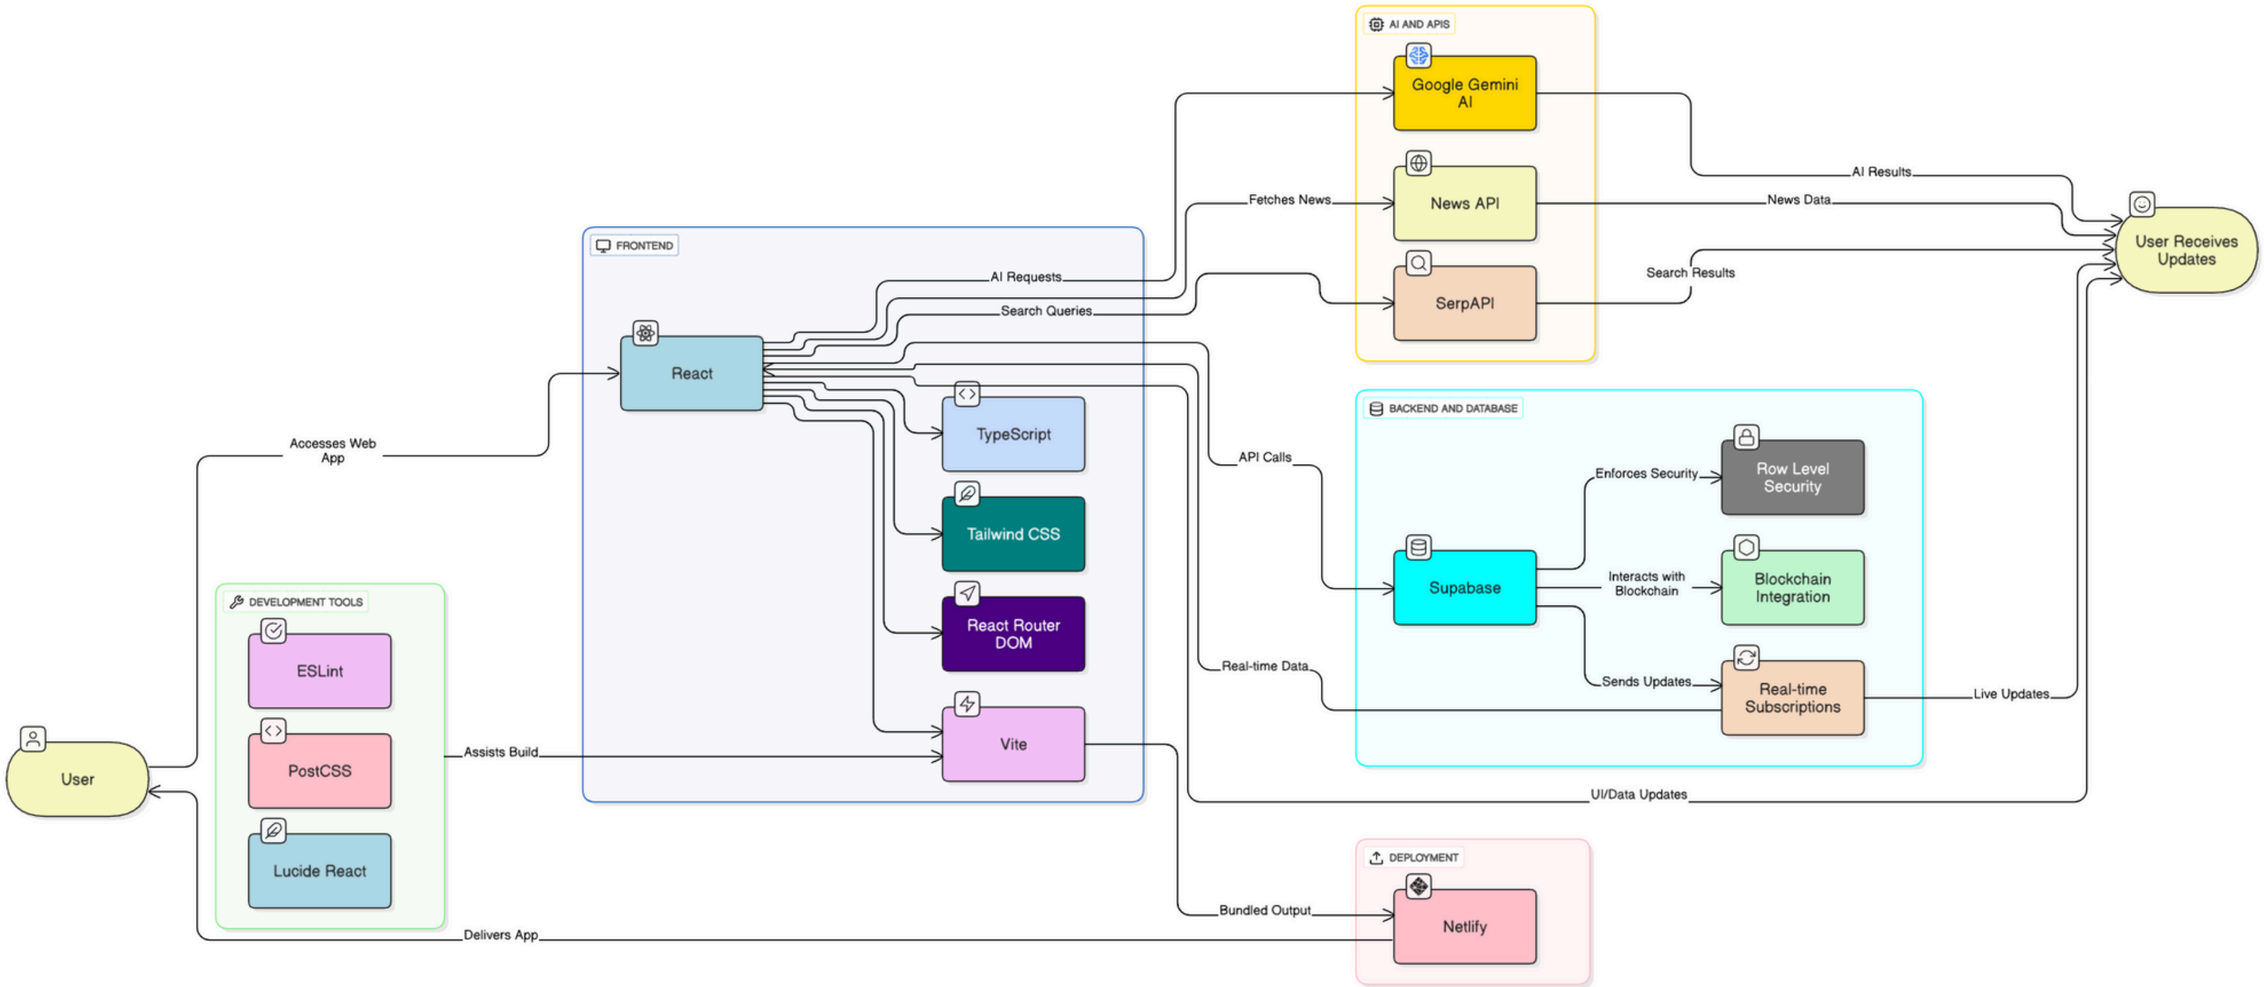

Key Features:

- Real-Time Credibility Scoring: Utilize AI to analyze news articles and assign credibility scores based on author reputation and factual accuracy.
- Community Voting: Allow users to upvote or downvote news stories, fostering a collaborative approach to verification.
- Transparency: Offer clear reports on how credibility scores are determined, enhancing user understanding of the evaluation process.
